

INSIDE CDYB-Fit

LIGHTWEIGHT & EFFECTIVE

The embedded elastic frame can “shape” itself to the users and transfer the assisting force effectively.

The Unique "triple bands" design increases the force output by stabilizing the position of thigh straps for users without interfering free movement.

The patented lightweight differential mechanism ensures free walking and provides support only when needed automatically.

The force adjustment can be quickly done by pulling the straps or releasing the buckle.

CDYB-Fit

PRODUCT FEATURES

- A** Parts for adjustment
- R** Parts can be replaced manually
- D** Parts can be disassembled for cleaning

TECHNICAL PARAMETERS

Product weight	0.75 Kg
Applicable body weight	≤ 100 Kg
Applicable height	165 -190 cm
Gender restriction	None
Back muscle assisting	21 Kg (Max)
